Report Generated: Monday, October 12, 2026 at 4:48 PM

Time on Task: 2 hours, 26 minutes
Progress: 100%

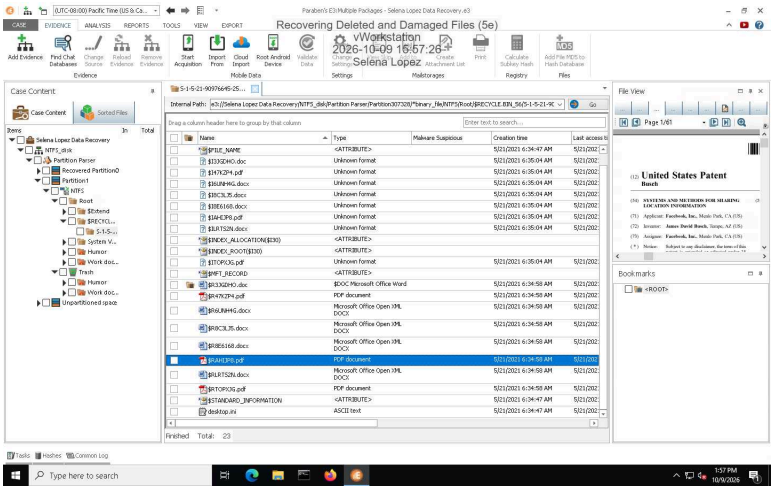

Hands-On Demonstration

Part 1: Recover Deleted Files from NTFS Drive Image

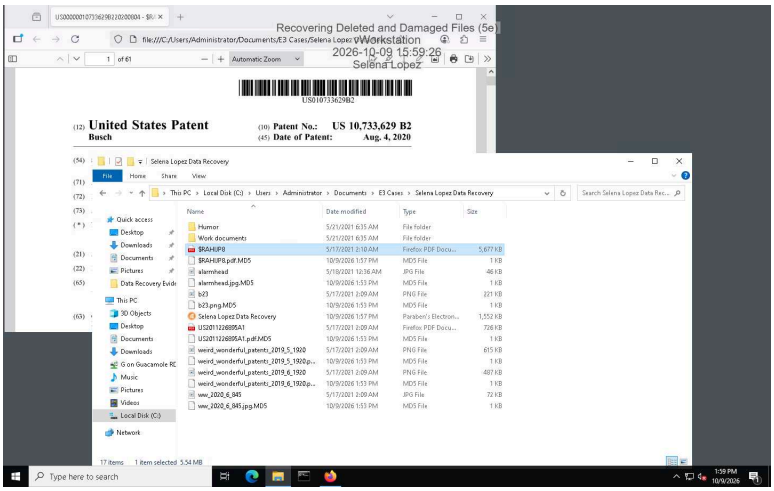

13. **Make a screen capture** showing the **list of recovered files and folders in the E3 Trash folder**.

20. **Make a screen capture** showing the **patent file in the File Viewer**.

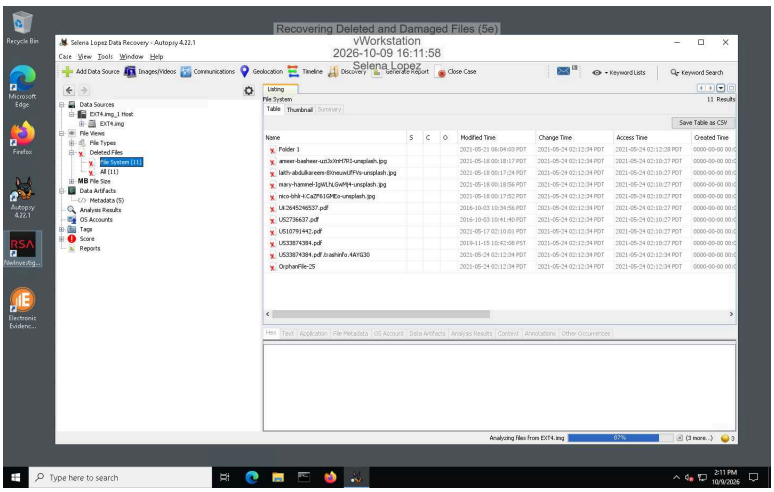

25. **Make a screen capture** showing the **recovered files in the File Explorer**.

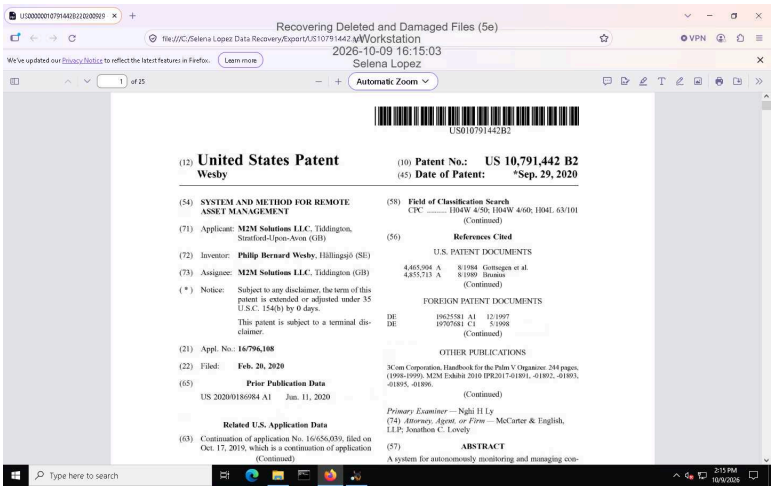

Part 2: Recover Deleted Files from Ext 4 Drive Image

14. **Make a screen capture** showing the **contents of the list of deleted files in Autopsy**.

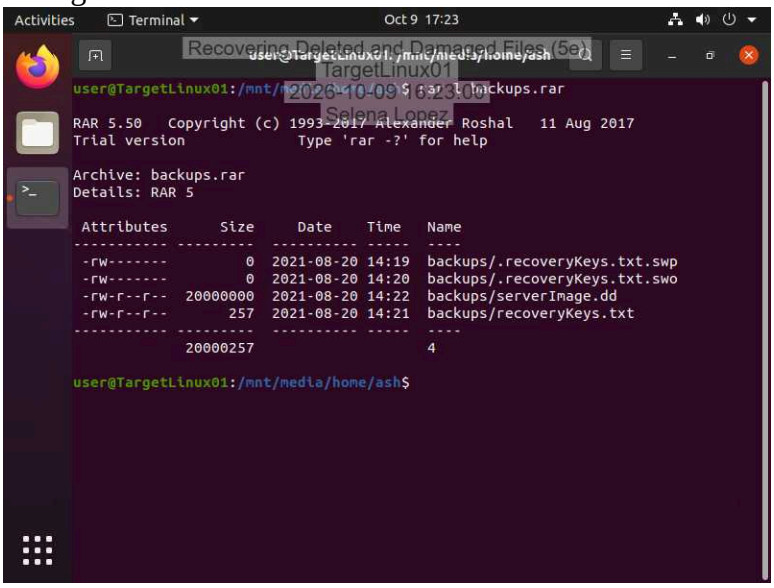

23. **Make a screen capture** showing the **recovered patent file**.

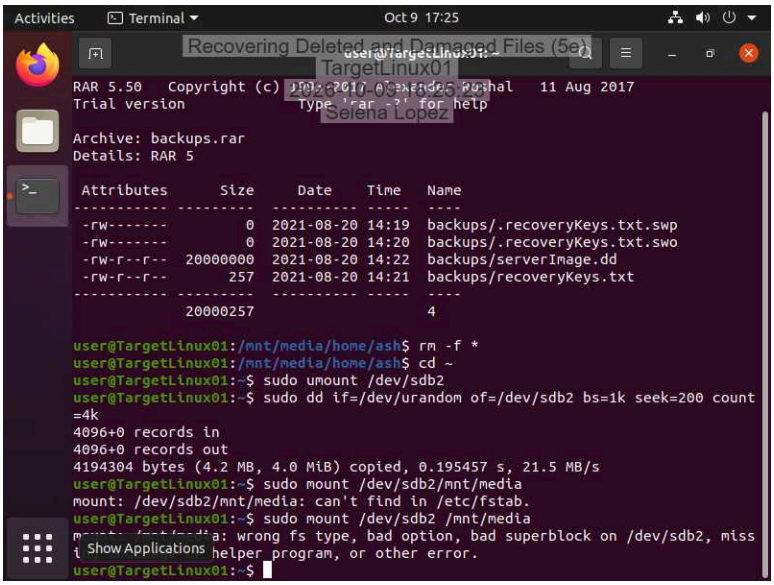

Applied Learning

Part 1: Simulating Data Deletion and Corruption

Make a screen capture showing the **contents of the RAR archive in the /mnt/media/home/ash directory.**

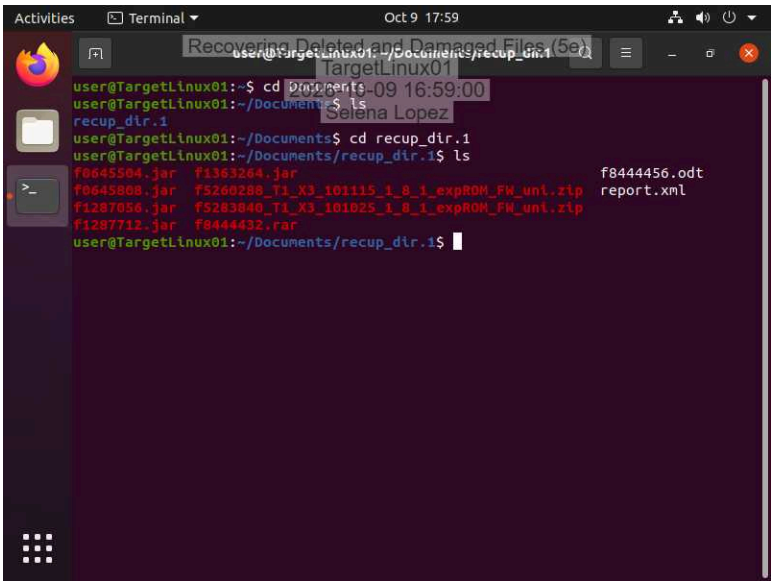

16. **Make a screen capture** showing the **failed mount attempt on the /dev/sdb2 device.**

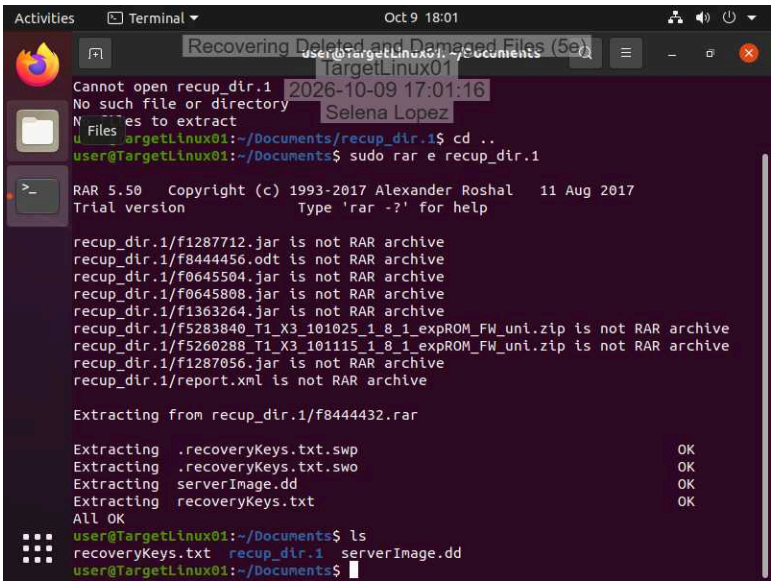

Part 2: Recovering Deleted and Corrupted Data Using Data Carving

19. **Make a screen capture** showing the **compressed files recovered by PhotoRec**.

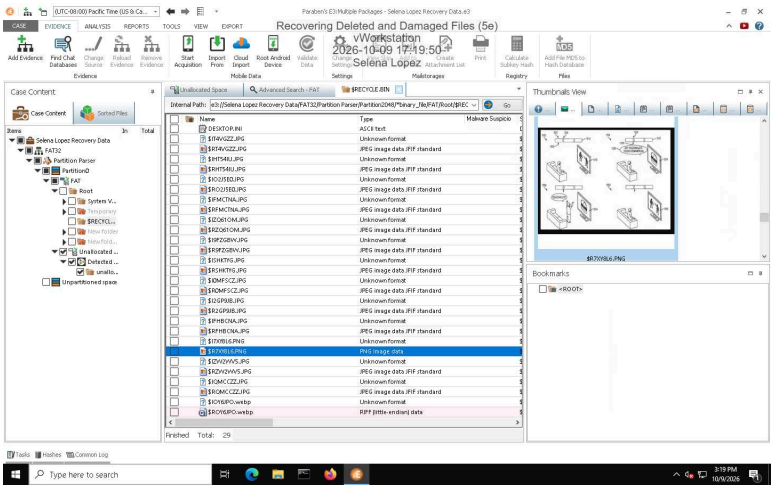

22. **Make a screen capture** showing the **backup files recovered from the RAR archive**.

Challenge and Analysis

Part 1: Recovering Deleted Files from a FAT32 Drive Image

Document your efforts in your forensic report by making a screen capture showing the patent file recovered from the FAT32 drive image within E3.

Part 2: Recovering Deleted Files from an APFS Drive Image

1. **Document** your efforts in your forensic report by making a screen capture showing the patent file recovered from the APFS drive image within Autopsy.
